

Enterprise & Agency Monetization Models

White-Label Reselling, Managed AI Staffing & Multi-Tenant Deployments

Dual Commercial Engines: Direct Enterprise & Agency Resellers

Fathom captures market share through two robust commercial motions: direct enterprise deployments for corporate efficiency, and agency partnerships that turn marketing/staffing firms into AI workforce providers.

1. AGENCY & WHITE-LABEL MODEL

Marketing, recruitment, and IT consulting agencies resell Fathom workers under their own brand:

- **Turnkey Lead Generation:** Agencies offer "Automated SDR as a Service" to clients, charging monthly retainers.
- **White-Label Dashboard:** Embed Fathom's Next.js web dashboard with custom agency branding.
- **Recurring High Margins:** Agencies capture 70–80% net profit margins on outsourced client fulfillment.

2. ENTERPRISE PRIVATE FLEET MODEL

Large corporations deploy self-hosted Fathom clusters behind corporate firewalls:

- **Dedicated On-Prem / VPC:** Complete data sovereignty with zero external data sharing (GDPR, 152-FZ).
- **Private LLM Connectivity:** Route inference to internal vLLM/Ollama clusters.
- **Active Directory / SSO:** Provision coworkers per department with fine-grained RBAC policies.

Commercial Revenue Streams Architecture

REVENUE STREAM	TARGET CUSTOMER SEGMENT	MONETIZATION STRUCTURE
Direct Seat Subscription	SMBs, Startups, Mid-Market	Flat monthly subscription per virtual employee seat.
Agency Volume Licensing	Lead-Gen Agencies, BPOs, Consultancies	Discounted multi-seat bundles with white-label portal rights.
Enterprise Platform License	Fortune 500, Financial Institutions	Annual platform license + custom tool integrations & dedicated SLAs.

Viral Agency Expansion: Every agency partner brings 10 to 50 end-clients, creating an exponential, self-funding B2B distribution channel.
