

Skill Marketplace & Template Network

Harnessing Community-Driven Personas and SOPs to Drive Long-Term Defensibility

The Template Network Effect: Collective Worker Intelligence

As the Fathom community expands, users and partners contribute domain-specific coworker configurations, prompt engineering frameworks, and tool bindings into a shared **Skill & Coworker Marketplace**.

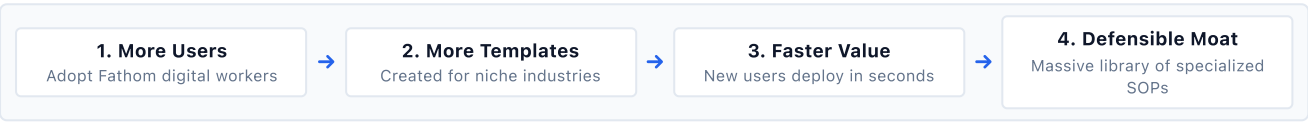

1-CLICK COWORKER TEMPLATE DEPLOYMENT

- **Fintech SDR:** Configured for 2GIS, Crunchbase, and LinkedIn financial technology search.
- **Biotech Patent Scout:** Deep-crawls PubMed, Google Patents, and university spin-off directories.
- **Real Estate PropTech Agent:** Scrapes property registries, municipal zoning filings, and broker directories.

MARKETPLACE CREATOR MONETIZATION

- **Template Revenue Sharing:** Creators receive a recurring royalty for every active seat running their template.
- **Verified Skill Badging:** Enterprise-certified SOPs undergo automated security and compliance audits.
- **Open Ecosystem:** Model Context Protocol (MCP) server plugins integrate third-party enterprise tools.

The Self-Reinforcing Platform Flywheel

The Network Advantage: Competitors might copy code, but they cannot replicate an active ecosystem of thousands of specialized, battle-tested employee personas.
