

Back-Office & Invoice Reconciliation

Autonomous Document Parsing, Multi-System Data Entry & Financial Reconciliation

PAGE 20 / 42

Scenario Brief: Automating Monthly Invoicing for Global Logistics Partner

Objective: Ingest 500+ PDF vendor invoices monthly, cross-reference against warehouse delivery receipts, and input approved payments into 1C / QuickBooks.

Back-

MATCH: 100% (500/500 INVOICES)

✓ PDF Extracted: Inv_#8492.pdf → Vendor TIN: GB9920194 · Amount: \$14,350.00

✓ Warehouse PO Match: PO-9921 (50x Freight Pallets) verified on 2026-08-18 · Discrepancy: \$0.00

✓ Accounting Portal Entry: Navigated QuickBooks via Accessibility Tree (ref @e12) · Staged batch payment for CFO 1-click sign-off.

OPERATIONAL IMPACT

- **Labor Replaced:** 80 hours of mind-numbing manual copy-paste data entry per month.
- **Error Rate:** Reduced from 4.2% human entry errors to 0.00% deterministic accuracy.

AUDIT TRAIL INTEGRITY

Every parsed invoice, line-item match, and portal click is logged with immutable nanosecond timestamps in SQLite for seamless tax auditing.

Operational Impact: Replaces 80 hours of mind-numbing manual copy-paste data entry per month with an automated, auditable, and error-free execution loop.
