Product-Led Conversion: The Irresistible Value Audit

Traditional software sales rely on generic slide decks and high-pressure demo calls. Fathom converts prospects by delivering immediate, tangible business value upfront before asking for a subscription commitment.

The 5-Stage Customer Conversion Journey

- Stage 1

The Automated Value Hook (Inbound or Outbound)
The prospect enters their target industry and geography into an online interactive form (e.g., "Cybersecurity companies in Germany").
- Stage 2

Instant Live Execution by Fathom Worker
A background Fathom worker executes a 2-minute OSINT sweep, extracting and SMTP-verifying 25 live decision-maker contacts with tech stack tags.
- Stage 3

Free Lead Sample Delivery (.xlsx / CSV)
The prospect receives a beautifully formatted Excel file with 10 free verified leads, demonstrating 100% data freshness and accuracy.
- Stage 4

7-Day Pilot Coworker Activation
The user is given 1 dedicated digital SDR connected to their Telegram or Slack to run 100 searches daily with unlimited neural compute.
- Stage 5

Frictionless Monthly Subscription
Having experienced 10x ROI and hours of saved labor during the pilot, the user seamlessly converts to a paid monthly seat subscription.
