

How Coworkers Remember Across Months

Long-Term Semantic Memory: Zero SaaS Cost, Local SQLite & True Institutional Knowledge

Persistent Institutional Intelligence vs. Stateless AI

Human employees become more valuable over time because they accumulate institutional knowledge: client preferences, industry jargon, and past project outcomes. Fathom equips digital workers with a persistent **Semantic Memory Engine** that compounds intelligence across months.

STATELESS AI ASSISTANTS (NO MEMORY)

- **Forget Everything:** Every new session starts from scratch; context is lost immediately upon closing the tab.
- **Repetitive Prompts:** Users must re-explain company guidelines, target criteria, and past decisions daily.
- **Expensive Cloud Vector DBs:** Third-party hosted vector databases cost thousands in recurring API fees.

FATHOM DIGITAL EMPLOYEES (PERSISTENT MEMORY)

- **Permanent Retention:** Discovered contacts, company facts, and client instructions persist indefinitely in SQLite.
- **Sub-5ms Memory Digest:** Relevant past facts are automatically summarized and injected at session start.
- **Zero External Cloud Costs:** Operates entirely in-process with local SQLite FTS5 (BM25) and TF-IDF vectorization.

Memory Growth Over Time

- Day 1

Initial Briefing & Territory Ingestion
The SDR coworker absorbs target market parameters, verified competitor lists, and outreach tone guidelines.
- Day 30

Entity Graph Compounding
The knowledge graph holds 2,500+ verified executive relationships, company tech stacks, and past email outcomes.
- Day 90

Full Institutional Fluency
The coworker detects executive job changes automatically: *"John Doe moved from Acme to Globex; updating CRM."*

SUB-5MS VOLATILE PROMPT DIGEST

When an agent starts a new session for a known client, the system dynamically compiles a deterministic memory digest in under 5 milliseconds and injects it directly into the initial reasoning prompt, providing a running start.

Compounding Asset: Your digital workforce becomes smarter, faster, and more tailored to your business every single day.
