

The Agency & White-Label Reseller Ecosystem

Empowering Marketing Agencies, Recruiters, and IT Firms to Deploy AI Employee Fleets

The B2B Multiplier: Turning Service Agencies into Software Operators

Digital marketing agencies, outbound lead-generation shops, executive search firms, and IT managed service providers (MSPs) face a critical bottleneck: labor costs consume 60–75% of revenue. **Fathom provides a turnkey white-label platform** that enables agencies to deploy fleets of autonomous coworkers for their clients.

Agency Operational Transformation

- **From Labor to Software Margins:** Transition from 20% services margin to **80–90% gross margin** on client retainers.
- **1-Click Multi-Tenant Deployment:** Manage 20+ client worker fleets from a single unified Fathom dashboard.
- **Custom White-Label Branding:** Present coworkers under the agency's custom domain, logo, and bot handles.
- **Dedicated Client Sandboxes:** Isolated Docker containers and SQLite databases ensure zero cross-client data leakage.

Agency Financial Model: 10-Client Deployment

Metric	Traditional Model	Fathom Fleet Model
Client Retainer Revenue (10 Clients)	\$30,000 / month	\$30,000 / month
Human SDR / Ops Payroll	\$21,000 / month (3 staff)	\$0.00
Fathom Runtime Cost	\$0.00	\$2,400 / month
Net Monthly Profit	\$9,000 / mo (30%)	\$27,600 / mo (92%)

Scale Without Hiring: An agency founder and one operations manager can seamlessly service 30 enterprise clients with 100+ active digital coworkers, achieving \$1M+ ARR at 90% net margin.
