

24/7 Market Intelligence & Competitor Tracker

Continuous Pricing Tracking, Feature Launches & Regulatory Monitoring

Scenario Brief: Real-Time Competitive Landscape Monitoring for FinPay Global

Objective: Continuously monitor 15 direct global competitors for pricing adjustments, new product features, key executive hires, and regulatory license filings with zero human manual browsing.

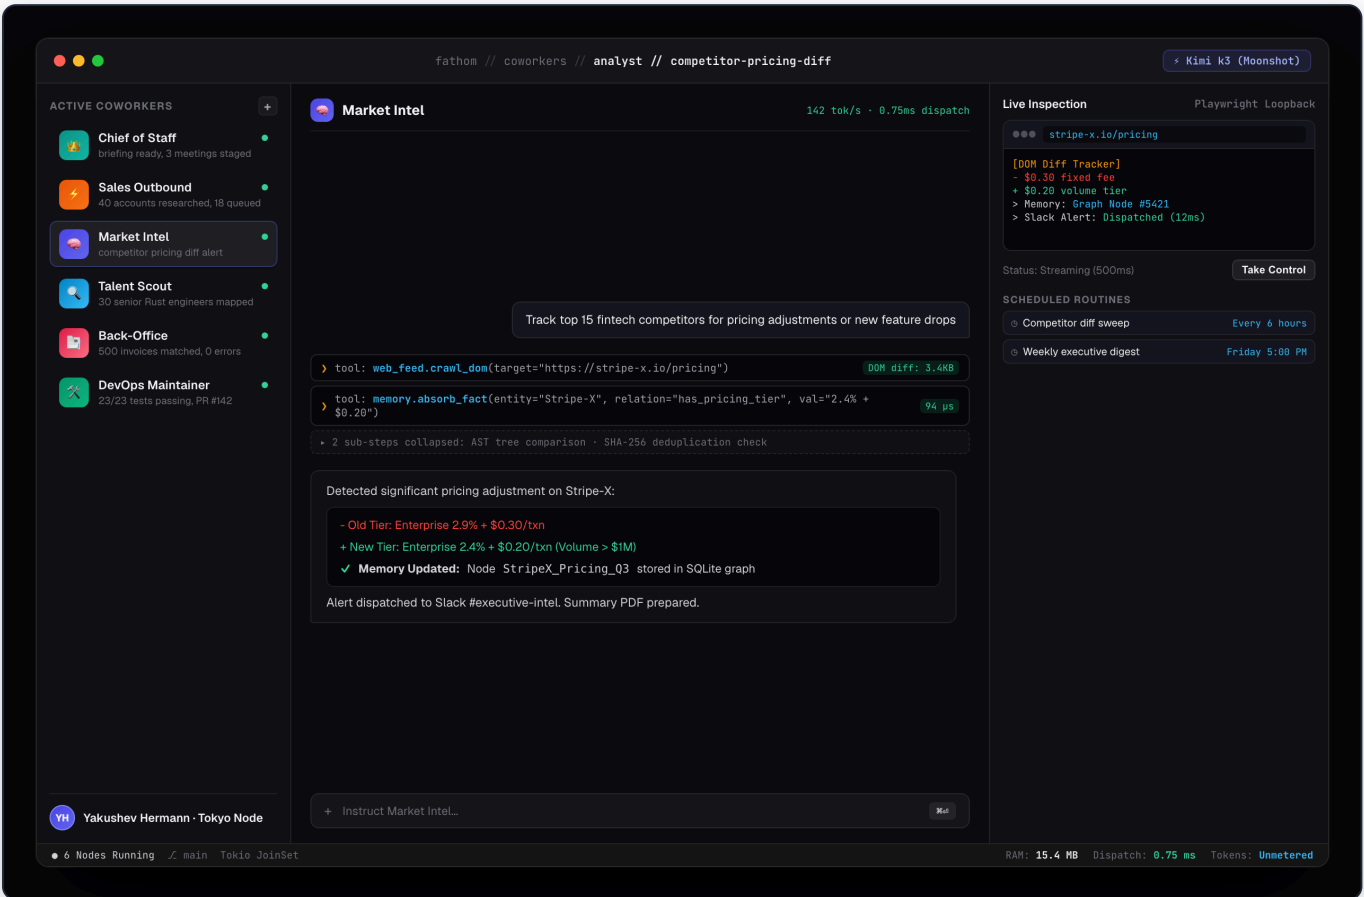

Figure 18.1: Real-Time Market Intelligence Engine – DOM diffing, pricing tier shift detection, and executive alert dispatch in 15 minutes

REAL-WORLD CASE: CAUGHT IN 15 MINUTES

When competitor *Stripe-X* adjusted their enterprise transaction fee on a Friday evening, the Fathom market analyst detected the pricing table DOM diff, updated long-term memory, and alerted the Chief Product Officer via Telegram within **15 minutes**.

INSTITUTIONAL KNOWLEDGE INGESTION

All competitor historical changes are stored permanently in Fathom's SQLite entity graph. When leadership asks: "*How has Competitor Y's pricing evolved over 6 months?*", the coworker generates an instant timeline report in under **5 milliseconds**.

Continuous Surveillance vs. Manual Market Research

SURVEILLANCE VECTOR	MANUAL MARKET ANALYST	FATHOM AUTONOMOUS INTELLIGENCE
Pricing Table Tracking	Monthly manual spreadsheet audit	Hourly automated DOM diffing & semantic change alerts
Executive Movements	Ad-hoc LinkedIn browsing	Real-time OSINT scraping across corporate registries & teams
Alert Latency	2–4 weeks (after customer notice)	< 15 minutes from live web deployment

Executive Value: Leadership stays three steps ahead of market dynamics with zero hours spent manually clicking competitor websites or reading press releases.
